INDEX TO SUBJECTS

ACID, amino, free, and amide composition, of host, effects of tobacco mosaic virus synthesis on, 791
—, nucleic, economy, in bacteria infected with bacteriophage T_2, purine and pyrimidine composition, 777
—, nucleic, and viral protein, independent functions in bacteriophage growth, 39
—, ribonucleic, content of *Bacillus megatherium* cells, growth rate, and bacteriophage yield, after infection with C bacteriophage, 581
Acids, nucleic, of some insect viruses, 201
Actomyosin, compressed monolayers, contractile properties, 139
Adenosinetriphosphatases, mitochondria of house fly, *Musca domestica* L., 371
After-potential of spinal axons *in vivo*, 643
Albumin, bovine, fluorescein-conjugated, physical and biological properties, 489
Alkaline earths, chlorides of, volume changes, ion exchanges, and fragilities of human red cells in solutions of, 767
Amide and free amino acid composition of host, effects of tobacco mosaic virus synthesis, 791
Amino acid, free, and amide composition of host, effects of tobacco mosaic virus synthesis on, 791
Animal red blood cells tagged with radioiron, *in vivo* survival of limited populations of, 327
— tissues, desoxyribonuclease activities, 227
Anions, monovalent, and manganese, stimulation of germination and respiration of *Bacillus megatherium* spores by, 617
Antigens, blood, *Cecropia* silkworm, qualitative and quantitative description, 389
Asphyxia, influence upon responses of spinal motoneurons, 673
Axons, spinal, *in vivo*, after-potential, 643

BACILLUS *megatherium* cells, growth rate, bacteriophage yield, and ribonucleic acid content, after infection with C bacteriophage, 581
— *megatherium* spores, stimulation by manganese and monovalent anions of respiration and germination, 617
— *mycoides* N host-virus system, interrelation of bacteriophage growth, bacterial multiplication, and lysis, 111
— *mycoides* N host-virus system, release of bacteriophage from lysogenic strain, 127
Bacteria, green sulfur, energetics of photosyntheses in, 161
— infected with bacteriophage T_2, nucleic acid economy, purine and pyrimidine composition, 777
Bacterial multiplication, bacteriophage growth, and lysis, interrelation in infections of *Bacillus mycoides* N with bacteriophage N in nutrient broth, 111
Bacteriophage growth, bacterial multiplication, and lysis, interrelation in infections of *Bacillus mycoides* N with bacteriophage N in nutrient broth, 111
— growth, independent functions of viral protein and nucleic acid in, 39

Bacteriophage production and growth of *Bacillus megatherium* cells, growth rate, bacteriophage yield, and ribonucleic acid content, after infection with C bacteriophage, 581
—, protection against x-rays by high concentrations of neutral salt, 345
—, release from lysogenic strain of *Bacillus mycoides* N, 127
— T_2, nucleic acid economy in bacteria infected with, purine and pyrimidine composition, 777
Beetle, Japanese, *Popillia japonica* Newman, cytochrome oxidase activity during diapause and metamorphosis, 751
Biological and physical properties of fluorescein-conjugated bovine albumin, 489
Biosynthesis, tobacco mosaic virus, and host nitrogen metabolism, relationships between, 807
Blood antigens of *Cecropia* silkworm, qualitative and quantitative description, 389
— cells, red. *See* Erythrocytes.
—, whole, oxygen dissociation studied polarographically, 255
Body, vitreous, vitrosin, structural protein of, 29
Bovine albumin, fluorescein-conjugated, physical and biological properties, 489
Bull and ram spermatozoa, motility in dilute suspension, 449

CARBON dioxide, cation, and phosphate content of muscle, effect of potassium deficiency, 153
Cation, carbon dioxide, and phosphate content of muscle, effect of potassium deficiency, 153
Cecropia silkworm, blood antigens, qualitative and quantitative description, 389
Cell nuclei components, uptake of glycine labelled with radioactive nitrogen by, 173
Cells, *Bacillus megatherium*, growth rate, bacteriophage yield, and ribonucleic acid content, after infection with C bacteriophage, 581
Cells, blood, red. *See* Erythrocytes.
—, non-viable, enzyme formation in, 631
Cellular integrity and electrolyte transfer, relation of frog skin metabolism to, 607
Chlorella, respiration and intensity dependence of photosynthesis in, 529
—, time course and quantum efficiency of photosynthesis in, 563
Chlorides of alkaline earths, volume changes, ion exchanges, and fragilities of human red cells in solutions of, 767
Clotting, inhibition by various neutral salts, and dissolution of fibrin in conversion of fibrinogen to fibrin, 759
Collodion membranes, characteristics for ultrafiltration, 431
Conduction and ganglionic transmission in gastropod nervous system, temperature modification, 463
Contractile properties of compressed monolayers of actomyosin, 139
Corn borer, European, *Pyrausta nubilalis* (HBN.), nutrition, unidentified dietary factor required for larval growth, 317
Corpuscle, blood, red. *See* Erythrocytes.
Cultivation of microorganisms, continuous, automatic recording of growth rates, 733
Cytochrome oxidase activity during diapause and metamorphosis of Japanese beetle, *Popillia japonica* Newman, 751

DESOXYRIBONUCLEASE activities of animal tissues, 227
Diapause and metamorphosis of Japanese beetle, *Popillia japonica* Newman, cytochrome oxidase activity during, 751

Dietary factor, unidentified, required for larval growth of European corn borer, *Pyrausta nubilalis* (HBN.), 317
Digitonin, saponin, and sodium taurocholate, kinetics of progressive reactions in systems containing, 723

EARTHS, alkaline, chlorides of, volume changes, ion exchanges, and fragilities of human red cells in solutions of, 767
Electrolyte transfer and cellular integrity, relation of frog skin metabolism to, 607
Energetics of photosyntheses in green sulfur bacteria, 161
Enzyme formation in non-viable cells, 631
Enzymes, proteolytic, and venom, action on non-specific inhibitor of hyaluronidase, 361
—, synthesis, mechanism, development of suitable system for study, 703
Erythrocyte, human, permeability to sodium and potassium, 57
Erythrocytes, animal, tagged with radioiron, *in vivo* survival of limited populations, 327
—, human, volume changes, ion exchanges, and fragilities in solutions of chlorides of alkaline earths, 767
—, specific heat, with special reference to paracrystalline rat erythrocyte, 507
Escherichia coli, photosensitized inactivation and reactivation phenomenon, mechanism, 207
— *coli* virus T_2, preparation, purification, and properties, 17
European corn borer, *Pyrausta nubilalis* (HBN.), nutrition, unidentified dietary factor required for larval growth, 317

FIBRIN, conversion of fibrinogen to, dissolution of fibrin and inhibition of clotting by various neutral salts, 759
Fibrinogen, conversion to fibrin, dissolution of fibrin and inhibition of clotting by various neutral salts, 759
Filtration, ultra-, characteristics of collodion membranes for, 431
Fluid uptake of rat kidney slices *in vitro*, 739
Fluorescein-conjugated bovine albumin, physical and biological properties, 489
Fly, *Musca domestica* L., mitochondria, adenosinetriphosphatases, 371

GANGLIONIC transmission and conduction in gastropod nervous system, temperature modification, 463
Gastropod nervous system, temperature modification of conduction and ganglionic transmission in, 463
Germination and respiration of *Bacillus megatherium* spores, stimulation by manganese and monovalent anions, 617
Glycine labelled with radioactive nitrogen, uptake by cell nuclei components, 173
Glycolysis and respiration of mouse liver slices, effect of helium, 513
Glycolytic metabolism and isolation of wheat germ nuclei, 181
Growth, larval, of European corn borer, *Pyrausta nubilalis* (HBN.), unidentified dietary factor required for, 317

HEAT, specific, of red cells, with special reference to paracrystalline rat red cell, 507
Helium, effect on respiration and glycolysis of mouse liver slices, 513
Hemes in hemoglobin, sulfhydryl groups and interaction between, 1

Hemoglobin, sulfhydryl groups and interaction between hemes in, 1
Host, free amino acid and amide composition, effects of tobacco mosaic virus synthesis, 791
— nitrogen metabolism and tobacco mosaic virus biosynthesis, relationships between, 807
Host-virus system, *Bacillus mycoides* N, interrelation of bacteriophage growth, bacterial multiplication, and lysis, 111
— system, *Bacillus mycoides* N, release of bacteriophage from lysogenic strain, 127
Hyaluronidase, action of venom and proteolytic enzymes on non-specific inhibitor of, 361

IMMUNOLOGICAL studies of insect metamorphosis, qualitative and quantitative description of blood antigens of *Cecropia* silkworm, 389
Insect metamorphosis, immunological studies, qualitative and quantitative description of blood antigens of *Cecropia* silkworm, 389
— viruses, nucleic acids, 201
Ion exchanges, volume changes, and fragilities of human red cells in solutions of chlorides of alkaline earths, 767
Isomers, cis-trans, of vitamin A and retinene in rhodopsin system, 269
—, geometrical, of retinene, 415

JAPANESE beetle, *Popillia japonica* Newman, cytochrome oxidase activity during diapause and metamorphosis, 751

KIDNEY, rat, slices, fluid uptake *in vitro*, 739
Kinetics of progressive reactions in systems containing saponin, digitonin, and sodium taurocholate, 723

LARVAL growth of European corn borer, *Pyrausta nubilalis* (HBN.), unidentified dietary factor required for, 317
Liver slices, mouse, effect of helium on respiration and glycolysis, 513
Lysis, bacteriophage growth, and bacterial multiplication, interrelation in infections of *Bacillus mycoides* N with bacteriophage N in nutrient broth, 111
Lysogenic strain of *Bacillus mycoides* N, release of bacteriophage from, 127

MAN, erythrocyte, permeability to sodium and potassium, 57
—, erythrocytes in solutions of chlorides of alkaline earths, volume changes, ion exchanges, and fragilities, 767
—, muscle, carbon dioxide content, 153
Manganese and monovalent anions, stimulation of germination and respiration of *Bacillus megatherium* spores by, 617
Membranes, collodion, characteristics for ultrafiltration, 431
Metabolic factors influencing sodium and potassium distribution in *Ulva lactuca*, 659
Metabolism, frog skin, relation to cellular integrity and electrolyte transfer, 607
—, glycolytic, of isolated wheat germ nuclei, 181
—, nitrogen, host, and tobacco mosaic virus biosynthesis, relationships between, 807
Metamorphosis and diapause of Japanese beetle, *Popillia japonica* Newman, cytochrome oxidase activity during, 751
—, insect, immunological studies, qualitative and quantitative description of blood antigens of *Cecropia* silkworm, 389

Microorganisms, continuously cultured, automatic recording of growth rates, 733
Mitochondria of house fly, *Musca domestica* L., adenosinetriphosphatases, 371
Mosaic virus, tobacco, biosynthesis and host nitrogen metabolism, relationships between, 807
— virus, tobacco, effects of synthesis on free amino acid and amide composition of host, 791
Motility of ram and bull spermatozoa in dilute suspension, 449
Motoneurons, spinal, influence of asphyxia upon responses, 673
Musca domestica L., mitochondria, adenosinetriphosphatases, 371
Muscle, effect of potassium deficiency on carbon dioxide, cation, and phosphate content, 153

NERVOUS system, gastropod, temperature modification of conduction and ganglionic transmission in, 463
Nitrogen metabolism, host, and tobacco mosaic virus biosynthesis, relationships between, 807
—, radioactive, glycine labelled with, uptake by cell nuclei components, 173
Nuclease, desoxyribo-, activities of animal tissues, 227
Nuclei, cell, components, uptake of glycine labelled with radioactive nitrogen by, 173
—, wheat germ, isolation and aspects of glycolytic metabolism, 181
Nucleic acid economy in bacteria infected with bacteriophage T_2, purine and pyrimidine composition, 777
— acid, ribo-, content of *Bacillus megatherium* cells, growth rate, and bacteriophage yield, after infection with C bacteriophage, 581
— acid and viral protein, independent functions in bacteriophage growth, 39
Nucleic acids of some insect viruses, 201
Nutrition of European corn borer, *Pyrausta nubilalis* (HBN.), unidentified dietary factor required for larval growth, 317

OXIDASE, cytochrome, activity during diapause and metamorphosis of Japanese beetle, *Popillia japonica* Newman, 751
Oxygen dissociation of whole blood studied polarographically, 255

PANCREAS, protein formation in, 243
Paracrystalline rat red cell, specific heat of red cells with special reference to, 507
Permeability of human erythrocyte to sodium and potassium, 57
Phage. *See* Bacteriophage.
Phosphate content, carbon dioxide, and cation of muscle, effect of potassium deficiency, 153
Photosensitized inactivation of *Escherichia coli* and reactivation phenomenon, mechanism, 207
Photosyntheses in green sulfur bacteria, energetics, 161
Photosynthesis in *Chlorella*, respiration and intensity dependence, 529
— in *Chlorella*, time course and quantum efficiency, 563
Physical and biological properties of fluorescein-conjugated bovine albumin, 489
Polarographic study of oxygen dissociation of whole blood, 255
Popillia japonica Newman, cytochrome oxidase activity during diapause and metamorphosis, 751
Potassium deficiency, effect on carbon dioxide, cation, and phosphate content of muscle, 153

Potassium rejection, sodium uptake, and skin potential, relationship in isolated frog skin, 473
— and sodium distribution in *Ulva lactuca*, metabolic factors influencing, 659
— and sodium, permeability of human erythrocyte to, 57
Potential, after-, of spinal axons *in vivo*, 643
—, skin, sodium uptake, and potassium rejection, relationship in isolated frog skin, 473
Protein formation in pancreas, 243
—, structural, vitrosin, of vitreous body, 29
—, viral, and nucleic acid, independent functions in bacteriophage growth, 39
Proteolytic enzymes and venom, action on non-specific inhibitor of hyaluronidase, 361
Purine and pyrimidine composition in nucleic acid economy in bacteria infected with bacteriophage T_2, 777
Pyrausta nubilalis (HBN.), nutrition, unidentified dietary factor required for larval growth, 317
Pyrimidine and purine composition in nucleic acid economy in bacteria infected with bacteriophage T_2, 777

QUANTUM efficiency and time course of photosynthesis in *Chlorella*, 563

RADIOACTIVE nitrogen labelling glycine, uptake by cell nuclei components, 173
Radioiron, *in vivo* survival of limited populations of animal red blood cells tagged with, 327
Ram and bull spermatozoa, motility in dilute suspension, 449
Respiration and germination of *Bacillus megatherium* spores, stimulation by manganese and monovalent anions, 617
Respiration and glycolysis of mouse liver slices, effect of helium, 513
— and intensity dependence of photosynthesis in *Chlorella*, 529
Retinene, geometrical isomers, 415
— and vitamin A in rhodopsin system, cis-trans isomers, 269
Rhodopsin system, cis-trans isomers of vitamin A and retinene in, 269
Ribonuclease, desoxy-, activities of animal tissues, 227
Ribonucleic acid content of *Bacillus megatherium* cells, growth rate, and bacteriophage yield, after infection with C bacteriophage, 581
Roentgen rays, protection of bacteriophage against by high concentrations of neutral salt, 345

SALT, neutral, high concentrations, protection of bacteriophage against x-rays by, 345
Salts, neutral, dissolution of fibrin and inhibition of clotting by, in conversion of fibrinogen to fibrin, 759
Saponin, digitonin, and sodium taurocholate, kinetics of progressive reactions in systems containing, 723
Silkworm, *Cecropia*, blood antigens, qualitative and quantitative description, 389
Skin, frog, metabolism, relation to cellular integrity and electrolyte transfer, 607
— potential, sodium uptake, and potassium rejection, relationship in isolated frog skin, 473
Sodium and potassium distribution in *Ulva lactuca*, metabolic factors influencing, 659
— and potassium, permeability of human erythrocyte to, 57
— taurocholate, saponin, and digi-

tonin, kinetics of progressive reactions in systems containing, 723
Sodium uptake, potassium rejection, and skin potential, relationship in isolated frog skin, 473
Spermatozoa, ram and bull, motility in dilute suspension, 449
Spinal axons *in vivo*, after-potential, 643
— motoneurons, influence of asphyxia upon responses, 673
Spores, *Bacillus megatherium*, stimulation by manganese and monovalent anions of respiration and germination, 617
Sporulation in distilled water, 601
Sulfhydryl groups and interaction between hemes in hemoglobin, 1
Sulfur bacteria, green, energetics of photosyntheses in, 161

TEMPERATURE modification of conduction and ganglionic transmission in gastropod nervous system, 463
Time course and quantum efficiency of photosynthesis in *Chlorella*, 563
Tissues, animal, desoxyribonuclease activities, 227
Tobacco mosaic virus biosynthesis and host nitrogen metabolism, relationships between, 807
— mosaic virus, effects of synthesis on free amino acid and amide composition of host, 791
Transmission, ganglionic, and conduction in gastropod nervous system, temperature modification, 463
Triphosphatases, adenosine-, mitochondria of house fly, *Musca domestica* L., 371

ULTRAFILTRATION, characteristics of collodion membranes for, 431
Ulva lactuca, metabolic factors influencing sodium and potassium distribution in, 659

VENOM and proteolytic enzymes, action on non-specific inhibitor of hyaluronidase, 361
Viral protein and nucleic acid, independent functions in bacteriophage growth, 39
Virus T_2, *Escherichia coli*, preparation, purification, and properties, 17
—, tobacco mosaic, biosynthesis and host nitrogen metabolism, relationships between, 807
—, tobacco mosaic, effects of synthesis on free amino acid and amide composition of host, 791
Viruses, insect, nucleic acids, 201
Virus-host system, *Bacillus mycoides* N, interrelation of bacteriophage growth, bacterial multiplication, and lysis, 111
— system, *Bacillus mycoides* N, release of bacteriophage from lysogenic strain, 127
Vitamin A and retinene in rhodopsin system, cis-trans isomers, 269
Vitreous body, vitrosin, structural protein of, 29
Vitrosin, structural protein of vitreous body, 29

WATER, distilled, sporulation in, 601
Wheat germ nuclei, isolation and aspects of glycolytic metabolism, 181

X-RAYS. *See* Roentgen rays.
